-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 11-20 is/are pending in the application.

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 11,15,16 are rejected under 35 U.S.C. 102(e) as being anticipated by Sauter et al 6,967,314. Sauter et al teach a cooking device 4 having a display 60, a low power heating element and a high output heating element, see abstract, with a controller 58 which controls the heat output and the display, as claimed. Note that the display is construed to display a set of symbols, as broadly claimed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12-14, 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sauter et al 6,967,314 in view of Stockley 2005/0000958. Sauter et al teach the claimed cooking controller except for defining the display as a seven segment display. It is submitted that the artisan would have found it obvious to use a seven digit or any multi-digit display for the display, depending on the end use of the device and the type of display desired. In addition, the patent to Stockley is applied for clearly teaching that a seven segment display is conventional in a cooking device and effects an efficient display of cooking data and sensed parameters. See paragraph 0032 in Stockley which teaches a seven segment display to display the cooking progress. In view of this teaching it would have been obvious to modify the Sauter et al system to use a display having seven segments, since such display has been shown effective to display cooking information, as broadly defined. As per claim 3 use of numerical symbols is set forth in Sauter et al and if modified as set forth above it is inherent that use of numerical display numerals is obvious for the artisan. Use of three transverse segments as per claim 14 is a routine matter of choice having no patentable bearing on the claimed device. As per

Art Unit: 3742

claim 18 use of the controller to control a gas system is an obvious choice, the controller in Sauter et al as modified, capable of controlling wither a gas or electric heater.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 115-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 defines a "cooking area", but the claimed subject matter is directed to a cooking controller. It is not clear and hence vague and indefinite of how a "cooking area" is related to a cooking device.

These claims present only method limitations, and depict no further structural limitations to define the claimed device.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ohouchi, Barnes and Norwood are cited for disclosing cooking devices having display systems of interest to the disclosed invention
